Singapore PR

meetmamata@gmail.com

Professional Summary

Results-driven QA professional with over 12 years of combined experience in software testing and development, including 7+ years specializing in quality assurance and 5 years in software development using Java/J2EE and C#.NET. Proven track record across Banking, Transportation, and Healthcare domains, delivering high-quality software through rigorous functional, system integration, regression, unit, and UI testing. Solid command of STLC, SDLC, and Agile methodologies, with hands-on experience managing and tracking defects using ALM and JIRA. Skilled in preparing and executing test cases, test scripts, and documenting results within test management tools. Holds a Computer Science degree and demonstrates a strong ability to collaborate effectively with developers, business analysts, project managers, and cross-functional teams to drive quality outcomes throughout the software development lifecycle.

Skills

Automation Tools:	Selenium WebDriver, Appium	Build Tools:	Maven, Log4j for logging
Database:	MS SQL Server, Oracle Database	Test Management:	JIRA, Zephyr, Confluence
Framework:	TestNG, JUnit, Cucumber	Version Control & CI/CD:	Git, GitHub, Bitbucket, Jenkins
API Testing Tools:	Postman	IDE/Development Tools:	IntelliJ IDEA, Eclipse
Languages:	Java, J2EE	Domain Experience:	Banking, Health, Transportation

Education

Computer Science & Engineering B'Tech	J.N.T.U. India	April 2001

Experience

QA Analyst

DBS

Jan'24 - Till Date

Key Responsibilities:

Agile/Scrum Participation:

- Participated in daily stand-up meetings, Sprint Planning, Story Grooming, and Sprint Retrospectives.

Test Planning & Execution:

- Designed test scenarios and executed manual test cases across multiple projects including Fraud Dispute, BTIL, SSO Deeplinking, Apple Wallet, Mobile Wallet Provisioning, V10 (Vision Plus) Upgrade, L2 Enhancements, and PayLah TravelLah Debit Card.
- Updated execution results with artifacts into sprint cycles in Zephyr.
- Performed UAT, Regression, and Functional Testing across assigned modules.

Automation Testing:

- Executed automated test scripts using JBehave for Mobile Wallet Provisioning and PayLah TravelLah Debit Card modules.

Defect Management:

- Raised, tracked, and managed defects in Jira with timely retest and closure.

Backend Validation:

- Verified test results against backend subsystems to ensure end-to-end accuracy across modules.

Stakeholder Collaboration:

- Coordinated with developers, business analysts, and Product Owners to report testing status and support release readiness.
- Acted as POC for release coordination and testing execution across assigned projects.

Software Tester

Helius Technologies,
Singapore, Client: DBS Bank
Mar'19 - Dec'23

Key Responsibilities:

Agile/Scrum Participation:

- Participated in daily stand-up meetings, demos, retrospectives, sprint grooming, and requirement clarification meetings.
- Updated daily status to Product Owners and performed Downtime Tracking.

Test Planning & Execution:

- Designed test scenarios and translated them into JBehave scripts covering UI, functional, error, and negative scenarios.
- Created, executed, and updated test cases with artifacts into sprint cycles in Zephyr.
- Executed AA Tagging, Feature Flag, Functional, Regression, UAT Regression, Responsive, and UI/UX test cases.
- Verified application across multiple devices, browsers, iOS and Android to meet Figma design standards.

Defect Management:

- Raised, reported, and tracked defects during execution with timely retest and closure including Root Cause Analysis (RCA).
- Documented test defects and procedures to enable accurate replication and ensure compliance with standards.

Backend & Data Validation:

- Verified test results against backend subsystems including V+, CMCP, and Finacle.
- Collaborated with test data teams to obtain and prepare required test data per test case requirements.

Stakeholder Collaboration:

- Coordinated with developers, business analysts, and Product Owners to support product rollouts across multiple build releases.
- Interacted with Product Owners, Designers, and Developers to discuss QC concerns and timely escalation of issues.

Domain & Module Coverage:

- Tested across Credit Card modules (Digital Fraud Dispute, Supplementary Card Management), Mobile Banking, Internet Banking, Comprehensive Portfolio, FX Leave Order, Gold Accounts, Gold DCI, OBU, UT & FX, OFT, and Swift Remittance for DBS Digibank SG, Taiwan, and China.

Pre-Sales and support Engineer

IPrime Consultants,
Singapore
Oct'17 - Nov'18

Key Responsibilities:

Test Planning & Execution:

- Prepared and executed test cases for modules including Schedule Management, Vehicle Management, Resource Management, Leave Management, Attendance, and Public Bookings.
- Performed Functional, UI, and Manual Testing across multiple application modules.

Defect Management:

- Reported and tracked bugs identified during testing.
- Interacted with the development team to facilitate timely resolution of defects.

Requirements & Data:

- Analyzed and understood business requirements to drive test case design.
- Prepared test data to support verification of test cases across modules.

Software Developer / Systems Analyst

Various Clients — Crimson
Logic Pte Ltd | NEC
Solutions Asia Pacific | ECS
Computers (Asia) Pte Ltd,
Singapore
Mar'04 – Jul'08

Engineered and deployed scalable web applications across the Healthcare, Justice, HR, and Government Finance sectors for key clients including CrimsonLogic, NEC, and ECS.
